

Planning for Community Infrastructure

K2 Planning community infrastructure plans aim to ensure that community facilities are:

- Well located to ensure multiple uses
- Adaptable to changing community trends and expectations
- Responsive to the planning directions of local services

Our approach to planning for community infrastructure includes:

- Demographic analysis - local and projected trends
- Comprehensive audits of current service provision
- Analysis of current levels of service usage
- Gaps Analysis
- Floor space and service configuration recommendations

Our recent community infrastructure projects include:

- Hume North Growth Corridor - Health Master Plan (Hume City Council, 2014)
- Eaglehawk Community Facilities Audit and Needs Assessment (City of Greater Bendigo, 2014)
- Arden Macaulay Community Infrastructure Needs Analysis (City of Melbourne 2011)
- City North Community Infrastructure Needs Analysis (City of Melbourne 2011)
- Hobsons Bay Community Services and Infrastructure Plan (Hobsons Bay City Council 2010-11)
- City of Kingston Community Services and Facilities Review (City of Kingston 2010-11)
- Review of Community Services and Facilities (Mount Alexander Shire Council 2010)
- Yarra Early Years Infrastructure Needs Analysis (City of Yarra 2009)
- AMCOR Site Social Infrastructure Needs Analysis (City of Yarra 2009)
- Community Infrastructure Planning Approaches (City of Yarra 2010)

Awards:

Our commitment to developing best practice planning for community facilities is reflected in the fact that, along with the Mount Alexander Shire Council, we were awarded a **Commendation at the Planning Institute Australia (PIA) Victoria Planning Excellence Awards 2010** Social and Community Planning for the Mount Alexander Review of Community Services and Facilities. This project identified a range of factors that impact on access to community services and facilities and proposed strategies to improve access for diverse groups.
